Open eGovernment Services

The CLARITY project is now nearing its halfway point and we wanted to share with you some of our work and what is upcoming in the next year.

- We have conducted a [stakeholder analysis](#) within the open eGovernment ecosystem.
- We have analysed the [key drivers](#) in the up-take of open eGovernment services in Europe
- We have conducted a [needs assessment](#) of societal, public sector and industry and market needs when it comes to the up-take of open eGovernment services.
- We held a [Development Sprint Event](#) in Amsterdam in December 2016, where four teams developed [blueprints for 4 new open eGovernment services](#).
- We have held two foresight focus groups with stakeholders in Sweden and Spain, and will host a third group in The Netherlands in March. Results will be in a forthcoming briefing paper on ***"Considerations for the take-up of open eGovernment services in Europe"*** - due in March 2017

Up-coming CLARITY deliverables and events

2017 will see the CLARITY open eGovernment marketplace, which will feature the CLARITY blueprint for next steps in open eGovernment services, and the results of our extensive cataloguing of open eGovernment solutions in Europe. The Marketplace will feature a description of each application as well as testimonials from users. We will also host a Validation workshop for the CLARITY blueprint, and a final conference and exhibition. All information will be on [our website](#), as well as social media - [twitter](#) and [LinkedIn](#)

 SONNETS		
<p>The CLARITY project collaborates with the SONNETS project, which focuses on emergent technologies in the public sector.</p>	<p>The CLARITY project is now on JoinUp. Follow our blog for updates.</p>	<p>The CLARITY project liaises with the SMARTICIPATE project which focuses on giving citizens better access to open government data.</p>
